

Unique Features & Competitive Advantage

Cloud Touch is single source solution for touch screen kiosks and interactive content creation. We specialize in hardware featuring Android OS and provide app based kiosk management software. We are able to remotely make content changes in real-time, provide 24/7 remote tech support and lock down all devices in a secure, password protected kiosk mode.

Cloud Touch

<p>Robust Hardware Selection: We provide a wide variety of indoor, outdoor, single-sided and double-sided kiosks. Screen sizes range from 21" to 85" and can be customized for each order.</p>	
<p>All-In-One Device (No External Media Player): With our technology there is no need to connect external devices to the kiosk. Featuring Wi-Fi, Ethernet, Camera, Microphone, Bluetooth, USB & Speakers.</p>	
<p>Android Operating System: We feature the Android OS on all kiosks. This provides superior security compared with Windows and allows users to demo mobile apps from the Google Play Store.</p>	
<p>Custom Interactive Content Design: Not just a hardware provider, we also create custom interactive content for clients. From maps and directories, to games, lead capture and photo booth, we do it all.</p>	
<p>Secure, Password Protected Kiosk Mode: Designed to deploy kiosks in a public environment without worry; our secure kiosk app features auto-refresh, screensaver timeout and password protection.</p>	
<p>App Based Screen Management Software: Our app-based technology provides a superior screen management solution. Receive notifications when a kiosk goes offline and update content in real-time.</p>	
<p>Nationwide Kiosk Rental Fleet: Need interactive signage at your next live event or want to upgrade your exhibitor booth? We provide kiosk rentals up to 5 days anywhere in the USA.</p>	
<p>24/7 Remote Tech Support: Have peace of mind knowing our tech support team is on standby for any help or questions. We can remotely access kiosks via our app for troubleshooting.</p>
